Reviewer’s report

Title: Meta-analysis on resected pancreatic cancer: A comparison between adjuvant treatments and gemcitabine alone

Version: 0 Date: 09 Sep 2018

Reviewer: Mehdi Ouaïssi

Reviewer's report:

The authors have reported a metanalysis which analyzed result of long term outcome of patients after pancreatic cancer treated by resection with adjuvant treatment vs resection with gemcitabine alone. Abstract must clarified because we didn't have definition of subgroup (S-1) author may defined S-1 in the abstract and may repeat it in material and method and in result section. This paper is very interesting and tried to answer to an important clinical question with some conflicting results in the literature.

Accept with minor corrections.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
