Reviewer’s report

Title: Hormone signaling via androgen receptor affects breast cancer and prostate cancer in a male patient: A case report

Version: 0 Date: 05 Jul 2018

Reviewer: Jocelyn Ceraline

Reviewer’s report:

The present Case Report entitled "Hormone signaling via androgen receptor affects breast cancer and prostate cancer in a male patient: A case report" is worth to be published. However, the authors should consider the possibility that the androgen receptor signalling could be altered during patient history, and consequently could affect the response to hormone therapies.

Some typing errors have been noticed through the manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
