Title: Risk Prediction for Breast Cancer in Han Chinese Women Based on a Cause-Specific Hazard Model

Version: 1 Date: 05 Dec 2018

Reviewer: Robert J. MacInnis

Reviewer's report:

The manuscript is much improved, but I have a couple extra comments:

1. How did the authors account for incomplete follow-up when computing the AUC? Probably better to use the c-statistic instead.

2. The validation of the Gail and HRA models results should be placed in the results section, not in the discussion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
