Reviewer’s report

Title: Malignant perivascular epithelioid cell tumor of the lung synchronous with a primary adenocarcinoma: one case report and review of the literature

Version: 0 Date: 02 Aug 2018

Reviewer: Leila Chbani

Reviewer's report:

Original case report about association between Malignant perivascular epithelioid cell tumor of the lung and primary adenocarcinoma

Case Presentation: HMB45 is negative but how you retained the diagnosis? what about CD117?

Discussion: it would be better if you explained more the association between malignant PECOMA and adenocarcinoma of lung. you can add a review of this case compared to all previous one reported before in the literature. the quality of the pictures used must be improved.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English
