Reviewer’s report

Title: A systematic review and meta-analysis of the prevalence of thrombosis and bleeding at diagnosis of Philadelphia-negative myeloproliferative neoplasms

Version: 0 Date: 28 Nov 2018

Reviewer: Eugenia Allegra

Reviewer's report:

The review is interesting and focuses on the importance of thrombotic manifestations and bleeding at diagnosis of Philadelphia-negative myeloproliferative neoplasms.

However, among the common sites, epistaxis is not reported despite being fairly common symptoms.

I wanted to ask the authors if, from the selected works, they found some data about it.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
