Reviewer’s report

Title: Cardiovascular medication use and risks of colon cancer recurrences and additional cancer events: a cohort study

Version: 0 Date: 08 Jan 2019

Reviewer: Elizabeth Dennett

Reviewer’s report:

Comprehensive study that helps with decision making around cardiac medications in the face of previous contradictory study result.

I think this is a good study and the results are well presented with appropriate limitations identified.

It is however not clear to me why Hispanic ethnicity is given its own category in all the tables apart from the Race category. In addition w.r.t to race - white and black are not races they are skin colours. Surely the appropriate categories are African American and American European? At the very least it would help to explain why Hispanic has a completely separate category to race.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
