Reviewer’s report

**Title:** Imaging Biomarkers for well and moderate Hepatocellular Carcinoma: Preoperative Magnetic Resonance Image and Histopathological Correlation

**Version:** 0  **Date:** 24 Feb 2019

**Reviewer:** Banu Alicioglu

**Reviewer's report:**

The authors did substantial revision of the manuscript. 65 cases were added to the study subjects totally 156 HCC cases were retrospectively studied. Nevertheless the number of grade I-IV HCC patient were not equally distributed, there was not low-differentiated HCC case. As a matter of fact, the study is still valuable. I suggest to change the title as 'Imaging Biomarkers for well and moderate Hepatocellular Carcinoma: Preoperative Magnetic Resonance Image and Histopathological Correlation as well as similar changes in the whole manuscript.
