Reviewer’s report

Title: Rationale and design of the German-Speaking Myeloma Multicenter Group (GMMG) trial HD6: A randomized phase III trial on the effect of elotuzumab in VRD induction/consolidation and lenalidomide maintenance in patients with newly diagnosed myeloma

Version: 1  Date: 23 Aug 2018

Reviewer: Wilson I. Gonsalves

Reviewer's report:

This is a well written manuscript that provides insight into the study design and end points of an ongoing clinical trial looking at the utility of elotuzumab to induction, consolidation and maintenance therapy for newly diagnosed MM pts.

I have no immediate concerns about this manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
