This manuscript introduced an interesting case with ARID1B and TSC2-mutation, and showed us detailed study method. The results gave us some main notes, such as considering mosaicism or post-zygotic variants and taking the efforts to detect them. Also I have two questions.

1. If the patient should be diagnosed as TSC? According to the criteria of International Tuberous Sclerosis Complex Consensus Group in 2012, TSC can be diagnosed with a finding of pathogenic TSC gene mutation, two main characters, one main character and two minor characters.

2. TSC mutation can induce mTOR activation, and increases cell growth angiogenesis, and cell migration, which can explain the renal AML and hepatic metastasis AML. Therefore I don't think that it is necessary to put forward the possibilities in Paragraph 1 in Discussion Section.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
