Reviewer’s report

Title: Everolimus in hormone receptor-positive metastatic breast cancer: PIK3CA mutation H1047R was a potential efficacy biomarker in a retrospective study

Version: 2 Date: 12 Apr 2019

Reviewer: Reviewer 2

Reviewer's report:

"REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed the previous reviewer's concerns sufficiently for you to recommend the revised work as a technically sound contribution? Yes

Reviewer comments: The authors responded to and addressed all the reviewer concerns. This includes having the manuscript reviewed/edited by a native English speaker. They also changed the abstract and title to more accurately portray the scope and results of the study. Requested revisions were made to the methods section, including a more detailed description of sample collection and patient participation, and appropriate or missing references were added."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further
assessment in your comments to the editors.
