I was asked to review a manuscript entitled, "Prognostic value of TGF-β in lung cancer: systematic review and meta-analysis". Overall, the paper was well analyzed, but the English is difficult. Although the author's main points are clear, the English needs to be greatly improved prior to publication. I have one small correction- The captions for figures 6 and 7 need to be reversed.

If the English is improved, I think that this manuscript is suitable for publication.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
