Reviewer’s report

Title: Lacrimal drainage system stenosis associated with Trastuzumab emtansine (Kadcyla®, T-DM1) administration: a case report

Version: 0 Date: 12 Apr 2019

Reviewer: Ludwig Heindl

Reviewer's report:

The paper "Nasolacrimal duct stenosis associated with Trastuzumab emtansine (Kadcyla®, T-DM1) administration: a case report" is a well-written paper of high clinical impact.

There are only a few points that have to be addressed by the authors:

i) How do the authors justify the etiology of the transient lacrimal stenosis? Do they have arguments pro Kadcyla association and against age-related "normal" inflammatory lacrimal stenosis? Please discuss.

ii) Perhaps the authors might add the dacryocystography findings following treatment in order to show the improvement?

iii) This paper "Orbit. 2010 Oct;29(5):298-306. doi: 10.3109/01676830.2010.492887. Tumors of the lacrimal drainage system. Heindl LM1, Jünemann AG, Kruse FE, Holbach LM." should be referenced and discussed in the manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics.

Quality of written English
Please indicate the quality of language in the manuscript:
