Reviewer’s report

Title: Dynamic and unpredictable changes in mutant allele fractions of BRAF and NRAS during visceral progression of cutaneous malignant melanoma

Version: 0 Date: 05 Sep 2018

Reviewer: Varsha Tembe

Reviewer’s report:

Hi,

The three artificial categories of MAF as monoclonal, polyclonal and subclonal the naming is misleading. Get confusing with the real clonality meaning.

No figure and table legends seen.

Figure 4 not very clear

Whole paper need to rewritten as not very clear.

May be its better to have a figure with MAF variations in primary and metastatic tumours

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
