Title: Silencing microRNA-330-5p increases MMP1 expression and promotes an invasive phenotype in oesophageal adenocarcinoma

Version: 1 Date: 12 May 2019

Reviewer's report:

In their revised manuscript BibbyB et al. have significantly clarified their manuscript according to reviewers comments. Their experimental and theoretical arguments are much more straightforward to follow than in the previous manuscript.

Overall, I believe the authors have addressed all of my concerns, and if they can address my relatively simple question about "limitations of in vivo model" in discussion part of the manuscript , I can gladly recommend their manuscript for publication in BMC Cancer.

Kind regards.
