Reviewer’s report

Title: Assessing a modified-AJCC TNM staging system in the New South Wales Cancer Registry, Australia

Version: 0 Date: 07 Jun 2019

Reviewer: Hongmei Zeng

Reviewer's report:

The manuscript compared the use of different staging systems in NSWCR population-based level cancer registration. The found RD-staging provided greatest stage data completeness and alignment to AJCC-TNM for prostate cancers. Whereas for colorectal cancer, summary stage from DoS was an equivalent surrogate staging system to both AJCC-TNM and RD-stage. The paper was well written. And the analysis may inform potential implementation of a new stage data field in population-based cancer registries.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
