Reviewer’s report

Title: Multiple Intraneural Glomus Tumors In Different Digital Nerve Fascicles

Version: 1 Date: 22 Jul 2019

Reviewer: Anja Harder

Reviewer's report:

Thanks for the revised version. I suppose some concerns were not adequately solved: please declare if glomangioma and glomangiomyoma as well as oncocytic change are ruled out within the histological description but not in discussion section. Please correct the new sentence: "The atypical features, mitoses and pleomorphism were normal" so that pathologists understand that there are no atypical features. I do not have other concerns and would suggest publication after minor corrections.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
