Reviewer’s report

Title: Multiband mucosectomy versus endoscopic submucosal dissection and endoscopic submucosal excavation for GI submucosal tumors: short and long term follow-up

Version: 1 Date: 13 Aug 2019

Reviewer: Ryan Thomas

Reviewer's report:

Jin and colleagues have done a very thorough job of addressing my critiques and suggestions.

This is a very interesting and timely paper given a push to less invasive treatment modalities of early stage esophageal and gastric tumors.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
