Reviewer’s report

Title: Quality of survival among symptomatic compared to PSA-detected prostate cancer survivors - Results from a UK wide patient-reported outcomes study

Version: 1 Date: 01 Sep 2019

Reviewer: Salome Adam

Reviewer's report:

Dear authors, thank you very much for addressing all comments carefully. It was a real pleasure to read the revised manuscript.

Just one minor suggestion remains. Even though with your amendments you address my previous comment about figure 1 already to a large extend, I would suggest changing the wording from "Depression" to "Feeling depressed", which is the original wording of the questionnaire.

The reason is that the EPIC-12 instruments is no validated instrument to screen for "Depression" as for example the Hospital Anxiety and Depression Scale (HADS) does.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
