Title: Identification of differentially expressed lncRNAs and mRNAs in luminal-B breast cancer by RNA-sequencing

Version: 1 Date: 29 Sep 2019

Reviewer: supreet agarwal

Reviewer's report:

In this manuscript, the authors analyzed 4 luminal B type breast cancer patients' tumors and adjacent normal tissues and identified several differentially expressed mRNA and lncRNAs. Overall, the results of this study are weak and descriptive. The authors should confirm their findings in a large cohort by analyzing public databases. Further, no subsequent functional study was performed to validate the identified genes and lncRNAs.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
