The subject considered is an interesting one and the paper is well organized. The introduction gave a satisfactory literature survey on the similar topic and it outlined the proposed method well. Appropriate figures were given to make the paper understood easily. I think that this paper is publishable after some minor revision.

1. Page 7 line 51-52 "while cancer with a primary site of the pylorus seemed to be protective compared with the heart", the "heart" should be "cardia".
2. The type of surgical procedure should be mentioned.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
