Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format. Please overwrite this text when adding your comments to the authors. The study addresses an important point in a growing subject SIRT(TARE). The authors found a considerable body of information regarding the CD8+ and CD4+ cell infiltration. Granzyme B suggests an antitumor immune response. Although the data are not supported by PBMC the results seem solid and acceptable.

Are the methods appropriate and well described?
