Title: Clinicopathological variables influencing overall survival, recurrence and post-recurrence survival in resected stage I non-small-cell lung cancer

Version: 0 Date: 02 Dec 2019
Reviewer: Junaid Ahmed

Reviewer's report:

1. Well written article with good insights into recurrence patterns in non small cell lung cancer. However the quality of written english can be improved and a language correction tool should be used for the entire Manuscript.

2. The study would have carried more weight if long term follow up results on patients with recurrence were evaluated for a period of more than 5 years wherever applicable.
