The manuscript by Zhang et al. investigates the predictive value of gamma-glutamyl transpeptidase to lymphocyte count ratio (GLR) in hepatocellular carcinoma patients, especially with microvascular invasion. The authors performed comparative analysis using a variety of clinicopathological parameters in HCC patients with microvascular invasion (MVI) or non-MVI. They also performed Kaplan-Meier analysis to assess the survival of HCC patients. In addition, univariate and multivariate Cox regression analyses were performed to establish the independent predictors affecting postoperative HCC patients. In this study, they have suggested that GLR could be a predictive biomarker of HCC after operation, and has a predictive value of HCC patients with MVI. The data presented are convincing. However, the manuscript requires significant attention to improve grammar and the readability. Apart from these general comments, I think it is an acceptable contribution to the field.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published
Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
