Reviewer's report

Title: Helicobacter pylori infection, dementia and primary open-angle glaucoma: how are they connected?

Version: 3  Date: 6 January 2015

Reviewer: Pete Williams

Reviewer's report:

Minor essential revisions:

Although the majority of issues have been resolved, there are still many instances of bad writing that are, in part, due to English as a first language and from missed typos.

Examples:
Capitalization of words in the middle of sentences
Vary use of the decimal point '.' or decimal comma ','
Use of the plus-minus symbol
Use of italicization in the text

This manuscript would benefit from another read through and edit by the authors as well a clean up by the editorial team.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
