Reviewer’s report

Title: Intravitreal cilium associated with retinal detachment 40 years following penetrating eye injury: a case report

Version: 2 Date: 30 January 2015

Reviewer: Michael Tsatsos

Reviewer's report:

Compulsory revision
The conclusion of the manuscript needs to be changed in accordance to the manuscript theme rather than a general comment on the inert nature of intraocular cilia

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
