Reviewer’s report

Title: The ugly side of cosmetic anterior chamber iris implants

Version: 2  Date: 10 June 2015

Reviewer: Konrad Koch

Reviewer’s report:

This is a nicely written case report, which adds to the growing number of papers describing the disastrous complications caused by “cosmetic NewIris” implants. In particular, the complication of a “fluid interface syndrome” (FIS) although not surprising has not been described in the context of anterior chamber “NewIris” implants.

Minor Essential Revisions:
Page 6, line 132/133:
The complete atrophy of the patients own iris stroma adjacent to NewColorIris implants (as shown by Koch et al., reference 9) should be added to this list.

Page 7,
incorrect spelling: "case reports" instead of "cases reports"

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
