Reviewer’s report

Title: Two or more dexamethasone intravitreal implants in treatment-naive patients with macular edema due to retinal vein occlusion: subgroup analysis of a retrospective chart review study

Version: 5 Date: 5 August 2015

Reviewer: Takashi Ueta

Reviewer’s report:

The authors report a subgroup analysis of their original SHASTA study. They investigated specifically the subgroup of treatment-naïve patients. I confirmed that the manuscript is scientifically sound, and related to the readership of BMC Ophthalmology.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
