Reviewer's report

Title: Accuracy of Optical Coherence Tomography (OCT) in Pachymetry in Glaucoma Patients

Version: 2 Date: 5 April 2015

Reviewer: Michele Iester

Reviewer's report:

This is an easy, well done study in which the authors compared CCT by OCT and ultrasound. The results suggest that there is no difference between the two methods.
Statistical analysis is well done.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
