Reviewer's report

Title: Drug discovery in ophthalmology: past success, present challenges, and future opportunities

Version: 2 Date: 4 September 2015

Reviewer: Luciano Quaranta

Reviewer's report:

I plaude the authors for their very interesting review paper. I suggest the authors to introduce some summary table of drugs and phase of development (I to IV) results of trials etc.. in order to help the readers in having a more precise scenario.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
