Reviewer's report

**Title:** A retrospective analysis of eleven cases of invasive rhino-orbito-cerebral mucormycosis presented with orbital apex syndrome initially

**Version:** 2  **Date:** 12 September 2015

**Reviewer:** Gary Lelli, Jr.

**Reviewer's report:**

Important topic. While this does not add new information to the literature, an additional 13 cases of this disease is important and has the ability to educate clinicians who may diagnose and treat this disease.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**
