Reviewer’s report

Title: Acute uveal effusion during phacoemulsification with preoperative central serous chorioretinopathy: a case report

Version: 1 Date: 10 May 2017

Reviewer: Jong Hwa Jun

Reviewer's report:

1. Page 7, Line 14~15. Please describe in more clear sentences. In my opinion, few blood in exudation is not related to diagnosis, but subfoveal effusion directly indicates that uveal effusion was cause of surgical problem. The author's sentence could induce confusion to readers.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
