Reviewer’s report

Title: Intraoperative Optical Coherence Tomography Assisted Analysis of Pars Plana Vitrectomy for Retinal Detachment in Morning Glory Syndrome: a case report

Version: 0 Date: 11 Mar 2017

Reviewer: Thiemo Rudolph

Reviewer's report:

Dear Author(s),

you are presenting an interesting case report of a patient with Morning Glory Syndrome. The management of retinal detachment (RD) as a potential sight threatening complication of this condition has been described before and you present a nice overview of present publications on that subject. You are presenting evidence that RD in your case was non-rhegmatogenous and caused by vitreomacular traction, utilizing intraoperative OCT imaging of the surgical procedure.

However, I would strongly urge you to submit your article to a thorough language revision. There are numerous spelling and grammar errors, but there is also quite some redundance in your discussion. The most obvious example is repeating almost a whole paragraph from page 10, line 45 on the next page 11, line 31 ("Based on iSDOCT analysis,...") word by word. Also, the last statement of the discussion is almost immediately repeated in your final conclusion section in slightly different words ("There is a high risk that retinal holes can develop" versus "...can lead to retinal break formation and retinal atrophy,...").

A thorough revision would therefore also reduce the length of the article and make it much more pleasant to read.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?
If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
