Reviewer’s report:

Dear authors,

Thanks for the opportunity to revise your manuscript. The information presented is useful and important.

Minor points: the abstract and the introduction must be shortened

Please add in the methods if patients in the groups were using any kind of eye-drops like natural tears.

The discussion part must be re-organized, it's difficult to follow. There are just lots of small sentences. Please put these together as paragraph.

Finally, the use of English should be improved, please let a native English speaking editor revise the manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
