Reviewer’s report

Title: Long term safety and tolerability of Tafluprost 0.0015% vs Timolol 0.1% preservative-free in ocular hypertensive and in primary open-angle glaucoma patients: a cross sectional study

Version: 0 Date: 08 May 2017

Reviewer: Maurizio Digiuni

Reviewer’s report:

Very good work

I noticed a couple of flows:

1) In the title and conclusion of the paper you write about safety and tolerability without define these two parameters. So, please define safety and tolerability in the methods.

2) Please specify in methods how many times per day PF-Timolol was administered. QD vs BID?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
