Reviewer’s report

Title: Early onset Coats' disease initially treated as unilateral ROP at 39 weeks postmenstrual age: a case report

Version: 0 Date: 23 Mar 2017

Reviewer: Stephan Hoffmann

Reviewer's report:

The manuscript „Early onset Coats disease initially treated as unilateral ROP at 39 weeks postmenstrual age: a case report“ by Peng et al reports a case report of a patient with Coats disease with all clinical pitfalls leading to therapy and diagnosis. The manuscript is well written and logically structured. Also the clinical pictures of the disease process are of interest. No criticism can be found.

The manuscript should be published in its current form in BMC Ophthalmology.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
