Reviewer's report

Title: Evaluation of preoperative speed of progression and its association with surgical outcomes in primary congenital glaucoma patients: a retrospective study

Version: 0 Date: 27 Jul 2017

Reviewer: Luciano Quaranta

Reviewer's report:

This is a nice and well written paper. The strong limitation is the retrospective design of the study. Nevertheless, this is an important topic even if not completely new.

In the intro and discussion please quote the possibility of medical treatment introduced by the study GIPSy (Quaranta et al Adv Ther. 2016 Aug;33(8):1305-15.).

Please also quote and discuss the results of goniotomy and ab-interno goniotrabeculotomy (Quaranta et al Ophthalmology. 1999 Jul;106(7):1357-62.) in comparison between adult and childhood glaucoma.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
