Title: Descemet Membrane Detachment in Femtosecond Laser-Assisted Cataract Surgery: A Case Report

Version: 0 Date: 05 Aug 2017

Reviewer: Hui-Ju Lin

Reviewer's report:

This is an interesting case report. Femtosecond laser-assisted cataract surgery (FLACS) become popular in recent and give many helps to Ophthalmologist in cataract surgery. Descemet membrane detachment (DMD) varying degree is a common complication is clear cornea approach cataract surgery. Experienced surgeons are familiar with prevent DMD in clear cornewound not only in FLACS but also in traditional phacoemulsification cataract surgery. Besides, not only 2 layers but also 3 layers cornea wound, without well control, all will induce DMD.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
