Reviewer’s report

Title: Short-term In Vivo Morphologic Changes of Amniotic Membrane after Fibrin Glue assisted Pterygium Surgery on Anterior Segment Optical Coherence Tomography: a case series

Version: 0 Date: 24 Aug 2016

Reviewer: Paulo Schor

Reviewer's report:

Did you observe any difference in the amniotic membrane integrated into the sclera of the patient that had undergone the scleral buckling surgery?

Did you find any relationship between the volume of blood and fibrin glue below the amniotic membrane and the time taken for the amniotic membrane to integrate into the sclera?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
