Reviewer’s report

Title: Comparison of femtosecond laser-assisted corneal intrastromal xenotransplantation and the allotransplantation in rhesus monkeys

Version: 0 Date: 01 Aug 2017

Reviewer: Je Hyung Hwang

Reviewer's report:

Page 4. last line : lamellae-> lamellar

The data of cornea clarity could be clarified

ex) In figure 4. Are these series of photos acquired from the same animal?

In figure 4. B The clarity cannot be assessed from the retoroillumination photograph.

In discussion section requires additional considerations about how such surgeries in animals can be applied in clinical situations.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
