Reviewer’s report

Title: Mapping Standard Ophthalmic Outcome Sets to Metrics Currently Reported in Eight Eye Hospitals

Version: 0 Date: 03 Aug 2017

Reviewer: Ian Murdoch

Reviewer's report:

The authors present a relevant and helpful cross-sectional study of reported therapeutic outcomes in 8 eye hospitals. Principal attention is given to cataract surgery and macular degeneration. The paper is well written and presented and adds to the debate spurring us on towards internationally agreed outcome reporting in ophthalmology. The authors do not discuss limitations in their methodology, it is quite possible they could have missed outcomes reported by some of the hospitals by simply not looking in the right place?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
