Reviewer’s report

Title: Goldmann and Error Correcting Tonometry Prisms Compared to Intracameral Pressure

Version: 1 Date: 16 Sep 2017

Reviewer: Giovanni Montesano

Reviewer's report:

The authors satisfactorily addressed my concerns.

Minor comment: The authors wrote: "Twenty one (21) total cadaver eyes were utilized. Three (3) eyes were measured at each of the following seven (7) intracameral pressures (5, 10, 20, 30, 40, 50, 60mm Hg). Measurements were completed five (5) times by two (2) different examiners (10 total) with each prism." It still looks like only three eyes have been used, measured multiple times, please rephrase so that it is clear in this sentence how all the 21 eyes have been used.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
