Reviewer’s report

Title: Does rituximab improve clinical outcomes of patients with thyroid-associated ophthalmopathy? A systematic review and meta-analysis

Version: 1 Date: 05 Nov 2017

Reviewer: Valentín Huerva

Reviewer's report:

Very interesting metanalysis report demonstrating the effectiveness of Rituximab in the treatment of TAO. What is effective already knew. And that it is not used is because of its high cost. However some items may add to the readers. After reviewing more than 800 reports it is not clear when to indicate this therapy. When Corticosteroids have failed etc ?? In what degree of Orbitopathy? What dose? Two injections of 1000 mg ?? Do you have to repeat the administration? There are recurrences.

The cost-benefit with respect to other therapies should be clear.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
