This was a very interesting paper in that there was a direct comparison of CPSC with FLACS in a teaching hospital. The was in which total surgical time was measured was helpful in that you attempted to truthfully document the full surgical time which is helpful in understanding the potential costs of doing this. Despite the small sample size, limited experience of surgeons and a few minor grammatical changes overall this is an interesting and strong paper.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
