Reviewer's report:

The authors reported a manuscript entitled ‘Social-Economic Analysis of Patients with Sjogren's Syndrome Dry Eye in East China: a cross-sectional study’. The manuscript is well written. Overall the conclusion part is not attractive or interesting. My specific comments are written below.

1. The hypothesis of the study is not clear. All of the medical conditions (diseases) have economic burden. What is the special situation for Sjögren Syndrome?

2. The sample size is very small for this kind of study.

3. The figures (graphics) may not be necessary.

4. The medical expense data may be explained in detail by giving the exact prices for the products.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics.
