Reviewer’s report

Title: A rare case of scleral buckle infection with Curvularia species

Version: 0 Date: 26 Nov 2017

Reviewer: Mark Mandelcorn

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

More information is required, as follows:-

line 44. On fundus examination, was there a visible buckle indentation, and, if so, was there any focal inflammatory reaction visible on the buckle internally? Please describe it. Was the inferior retinal detachment due to exudation or open retinal break?

line 54. What was the material of the buckle? Was it circumferential or a band and plate?

line 59. What were the medications in the antibiotic and antifungal wash? Was there a culture taken of the discharge prior to surgery? If so, why was the post op antibiotic regimen not tailored to the pre-operative microbial information?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
