Title: Earliella scabrosa-associated Postoperative Endophthalmitis after Phacoemulsification with Intraocular Lens Implantation: a Case Report

Version: 0 Date: 19 Sep 2017

Reviewer: Lyubomyr Lytvynchuk

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The authors presented very interesting case of postoperative endophthalmitis of unique origin. However, some information has to be clarified.

1. Abstract. Visual acuity has to be expressed in Snellen chart."2/20 in the right eye" please correct.

2. What do you mean? Please explain. (an agent of white rot on wood)

3. Case presentation: "corrected visual acuity of 2/20."?

4. Did the patient received antimicotic therapy?

4. Conclusion must be Discussion - you discuss a lot of published data.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
