Reviewer’s report

Title: Repeated intraocular crystallization of ganciclovir in one eye after bilateral intravitreal injections: a case report

Version: 1 Date: 07 Aug 2017

Reviewer: Ilir Arapi

Reviewer’s report:

I wish to thank Prof. Neri for the invitation in this review.

The present paper represents an interesting and rare case of intraocular gancyclovir crystallization.

1- In the manuscript it was not noted a complete work-up for the intraocular inflammatory condition.

2- The full list of medications regarding the many systemic co-morbidities accompanying the patient is missing. Was the patient under immunesupression?

3- BIO-score index is missing.

4- A post injection retinography (of the right eye) would be helpful. Was on OCT performed? Was an USG and OCT over the affected area done?

5- In the discussion section limitations are missing, and also the elucidation of gancyclovir crystallization should be further discussed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
