Reviewer’s report

Title: A clinical analysis of 25-gauge vitrectomy for severe vitreoretinopathy in patients with chronic renal failure.

Version: 0 Date: 21 Nov 2017

Reviewer: Yi Lu

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

1. It seems that the manuscript just used a standard 25-gauge vitrectomy to treat severe vitreoretinopathy in a special group of patients with CRF. The 25-gauge vitrectomy has been widely used in clinics at present and the clinical meaning of the manuscript is limited.

2. The language of this manuscript is so confusing and need comprehensive language editing. Such as: Abstract:15 showed increased visual acuities (93.75%), and one eye showed decreased visual acuity (6.25%); "Carefully conducted perioperative treatment and relatively stable systemic conditions, a well-designed minimally invasive vitrectomy can effectively treat vitreoretinopathy in patients with CRF".

Line 47 "Some studies have suggested that the incidence of hypertensive retinopathy is approximately 68% in patients with CRF complicated with hypertension, whereas the incidence of diabetic retinopathy (DR) is as high as 88.7% in complicated with DM.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

**Quality of written English**
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

**Declaration of competing interests**
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write ‘I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
