Reviewer's report:

Dear authors

Thank you for your response. This article became more logical and intuitive through revisions. I have just minor questions.

1. In discussion 4th page

Selenium caused cell apoptosis and when apoptosis occurred, the expression of Bcl-2 was reduced significantly,

Selenium -> Did you mean selenite? I thought it was your mistake.

2. postoperative complications of cataract in discussion & conclusion

Did you mean posterior capsular opacity? If that, you'd better change the term more specific.

Thanks.
