In the method part, I prefer to state the IRB approval 1st.
The measurement of TMH was based on slit lamp finding, I suppose the authors will measured either 0.5, 1, 1.5, 2....etc. Therefore, the significant figure should be 1 rather than 2 decimal space.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
